Summary

I am a full-stack developer dedicated to using my proficiency in ReactJS, NextJS, NodeJS, Tailwind CSS, PHP, and Object-Oriented Programming to create innovative, responsive, and user-friendly web solutions. By combining my skills and experience, I develop efficient and effective applications tailored to meet the unique needs of each project.

Work Experience

Front-end & Back-end Developer

May 2024 - Jan 2025

Pixstart

Developed functional pages using **Next.js Server Actions and Mutations**.

Ensured effective data communication using **Hygraph CMS with GraphQL**.

Enhanced user experience by adding **multi-language support** to pages.

Enriched user experience by adding animations to pages and added visual dynamism to projects.

Projects

To view the details and demos of my projects, please visit talhaozbek.com/projects.

The Godfather: A responsive web application developed using Node.js and EJS, featuring a robust backend infrastructure and modern design.

Star Cafe: A user-friendly cafe website developed with PHP, MySQL, and Tailwind CSS, offering product management functionality through the admin panel.

Learning Shadcn/UI: A modern educational project developed using Shadcn/UI and Tailwind CSS, with React, Next.js, and Framer Motion technologies.

Chicoland: A cafe menu website developed with Next.js, Tailwind CSS, and GraphQL. Menu data is stored using Hygraph.

Manastır Hotel: A user-friendly hotel introduction website developed using React, Tailwind CSS, EmailJS, i18next, and Formik.
